

AGREEMENT BETWEEN THE ADMINISTRATIONS OF FRANCE AND ITALY ON
MODIFICATIONS OF THE GE-06 PLAN FOR THE BAND 470-862 MHz

Considering that both parties agree to continue the work for developing the frequency plans to be used in the UHF band at completion of analogue switch-off, under mutually agreed conditions as discussed in previous bilateral meetings,

the Administrations of France and Italy agree to provide to the ITU their agreement, without reservations, to the following modifications to the GE-06 Plan:

- a) The modification of the allotments DT2 F__00420 (ALPES-MARITIMES-EST) and DT2 F__00421 (ALPES-MARTIMES-OUEST) and associated assignments¹ by changing channel 58 to channel 29,
- b) The addition of channel 29 in all the allotments of Corse and associated assignments,
- c) The modification of the allotments DT2 I2053IM29 (IM), DT2 I2109SV29 (SV), DT2 I2048GE29 (GE) and DT2 I2106SP29 (SP) and associated assignments by changing channel 29 to channel 58,
- d) The addition of channel 58 to all other Italian allotments and associated assignments in the Tyrrhenian arc²,
- e) The addition of channel 43 in the allotments of Alpes Maritimes Est, Alpes Maritimes Ouest and associated assignments, and all the allotments of Corse and associated assignments,
- f) The modification of the allotments DT2 I2070MS43 (MS), DT2 I2062LU43 (LU), DT2 I2044FI43 (FI), DT2 I2058LI43 (LI), DT2 I2051GR43 (GR) and DT2 I2104SI43 (SI), DT2 I2087PO43 (PO), DT2 I2085PI43 (PI), DT2 I2059LIISO43 (LIISO), DT2 I2052GRISO43 (GRISO) and associated assignments by changing channel 43 to channel 55,
- g) The addition of channel 55 to all other Italian allotments and associated assignments in the Tyrrhenian arc,
- h) The addition of channel 39 in the allotments of Alpes Maritimes Est and Alpes Maritimes Ouest and associated assignments,
- i) The addition of channel 47 to all Italian allotments and associated assignments in the Tyrrhenian arc.

The Administrations of France and Italy also agree that the corresponding allotments/assignments, as proposed for modifications of the GE-06 Plan, may be used from the date of analog switch-off in the corresponding regions.

¹ The associated assignments are those on the same channel and in the allotment area or within 20 km of it, whether they are linked with the allotment or not.

² The allotments in the Tyrrhenian arc are all the allotments with the Tyrrhenian Sea as one of their borders, as well as the allotments of Firenze (FI), Prato (PO) and Siena (SI).

This agreement is without prejudice of any detailed provisions that will need to be taken to ensure frequency coordination during the transition period.

In case all the coordination agreements necessary for successful completion of the corresponding GE-06 Plan modifications have not been obtained, both parties agree to cooperate to identify and implement mutually satisfactory alternative solutions.

It is understood that the present agreement represents a swap of channels between France and Italy in the GE-06 Plan, and that this swap must be done simultaneously, hence the recording in GE-06 Plan of the corresponding Plan modifications must be done simultaneously. Both parties therefore agree to initiate the formal ITU process for the corresponding modifications of GE-06 Plan only once all the necessary agreements have been obtained on both sides through the bilateral consultation process.

For the Administration of Italy	For the Administration of France
